RED OAK | MAPLE | POPLAR | WALNUT | ASPEN | PINE | ALDER | WHITE OAK

Since 1965 Woodland has “set the bar” for producing the highest quality moulding and stair part mill-work you can always count on. Now we have brought these exacting standards to our wood doors!

At Woodland we use only the Highest Quality FAS lumber and materials in fabricating our Wood Barn doors and trim so you know you are getting the absolute best. 100% Canadian Made!

Our hand crafted Barn doors are available in most wood species. The thick, solid hardwood faces allow and enhance the richness and depth of the wood for stunning visual appeal!

Have you ever had warped doors or challenges staining thin veneers?

Woodland introduces **Stabila-Core** - Our climate versatile engineered core technology provides unsurpassed resistance against warping, twisting, and movement that solid wood doors can endure during their lifetime long usage. Woodland doors are made with luxurious 5/16” FAS solid hardwood faces, this makes our doors the ideal choice in durability for high traffic and commercial applications where thin veneer particle core doors just aren’t designed to stand up.

Woodland doors are made with Luxurious 5/16” FAS solid hardwood faces enveloping our solid wood engineered ***Stabila-Core.***

When you see and experience a home crafted with Woodland mouldings, stairworks, millwork and doors ...You Know!
